Opening required for installation: 22"	* Handle adds 2.5"(6.4cm) to depth

Digital Electronic Controller

Adjustable Legs

### Durable Construction

The CE41PE is built with *prime 20-gauge cold-rolled top and sides* with a 14-gauge base. The *interior is made of Armco Type 1, 20-gauge aluminized steel*. The CE41PE comes standard with stainless steel front, or optional all stainless steel finish. The stainless steel is made of high quality, 18-gauge 430 stainless; the door interior is 18 gauge stainless.

### Energy Efficiency

The CE41PE is powered by four (4) 2000w elements which *increases its efficiency and recovery rate*.

### Capacity

*The CE41PE deck size measures 42"x32"x7"*. Actual cooking capacity depends on the size of the pizza you are cooking. The CE41PE will hold six (6) 12" pizzas or four (4) 16" pizzas. Cooking time will vary according to product, but will average between 8-10 minutes.

### Space Saver

Because the controls are under the door, the CE41PE requires *less installation space* than our competition. This enables you to free up valuable kitchen and/or hood space. The actual width needed is mere 50" for a *42"x32" deck*, almost a foot less than the competition. The CE41PE *can convert into a CE42PESC by stacking*, either initially or after your business grows. This option gives you two 42"x32" decks in only 56" of space.

### Design Plus

The CE41PE has the *controls in lower front for ease of operation and space savings*. This also places the controls in their own *air-conditioned area* so they are not affected by outside influences. In addition, the CE41PE is *totally thermocoupled* and allows you to replace individual parts as opposed to throwing away the whole system.
